

PRODUCT DATA SHEET

Sika ViscoCrete-5510

High range superplasticizer for concrete

DESCRIPTION

Sika ViscoCrete-5510 is a polycarboxylate based high range superplasticizer for concrete and mortar. Used for the production of site batched and ready mix concrete with extended slump retention, high water reduction and high strength development of concrete mixes.

USES

Sika ViscoCrete-5510 is suitable for the production of site mixed as well as ready-mix concrete.

Sika ViscoCrete-5510 is used for concrete with extended transportation of placing time.

Sika ViscoCrete-5510 facilitates extreme water reduction, excellent flow properties, optimal cohesion and highest self compacting behaviour.

Sika ViscoCrete-5510 is mainly used for the following types of concrete:

- Pump concrete for grade 15 MPa and above
- Hot weather concrete and concrete with extended transportation or placing time, typically 2 hours slump retention
- Concrete with highest water reduction (up to 30%)
- High strength concrete

High water reduction and excellent workability have a positive influence on the above mentioned applications.

CHARACTERISTICS / ADVANTAGES

Sika ViscoCrete-5510 acts by different mechanisms. Through surface absorption and sterical separation effect on the cement particles, in parallel to the hydration on process, the following properties are obtained:

- Strong self compacting behaviour, therefore suitable for the production of self compacting concrete (S.C.C)
- Extremely high water reduction (resulting in high

density and strengths)

- Excellent flowability (resulting in highly reduced placing and compacting efforts)
- Improved shrinkage and creep behaviour
- Reduced rate of carbonation of the concrete

Sika ViscoCrete-5510 does not contain chloride or other steel corrosion promoting ingredients. It may therefore be used without any restriction for reinforced and prestressed concrete construction.

APPROVALS / CERTIFICATES

Conforms to the requirements of MNS ASTM C494C/494M:2011.

PRODUCT INFORMATION

Composition	Polycarboxylic polyether type polymer									
Packaging	1000 kg IBC container									
Shelf life	12 months from date of production									
Storage conditions	Should be stored properly in undamaged unopened, original sealed packaging in dry conditions at temperatures between +5°C and +35°C. Protected from direct sunlight and frost. In case of long storage mix before.									
Appearance and colour	Opaque white liquid									
Density	~ 1.04 ± 0.02 kg/L									
pH-Value	4.0 - 6.0 (at 20° C)									
Total chloride ion content	Free (EN 934.01)									
Concreting guidance	The standard rules of good concreting practice, concerning production as well as placing, are to be followed. Refer to relevant standards. Fresh concrete must be cured properly.									
Recommended dosage	<ul style="list-style-type: none">▪ For Low to Medium Workability: 0.8 - 1.0% by weight of cementitious▪ For Flowing and Self Compacting Concrete (S.C.C): 1.2 - 2.5% by weight of cementitious									
Dispensing	<p>Sika ViscoCrete-5510 is added to the gauging water or simultaneously with it poured into the concrete mixer. For optimum utilization of the high water reduction we recommended thorough mixing at minimal wet mixing of 90 seconds.</p> <p>Effects of overdosing and underdosing: Significant overdosage will result in increased workability and setting time of the concrete and will cause bleeding of concrete mix. Underdosage will result in reduced workability (more difficult placing) and shorter setting times (reduced workable lifes). However, provided the concrete is cured effectively, the ultimate strength and properties will not be affected.</p>									
Compatibility	<p>Sika ViscoCrete-5510 can be combined with the following Sika Products:</p> <table><tr><td>- SikaPump®</td><td>- SikaFume®</td><td>- Intraplast® Z</td></tr><tr><td>- SikaRapid® series</td><td>- Sika® Antifreeze</td><td>- Sika® Aer</td></tr><tr><td>- Sika® FerroGard®-901</td><td>- SikaRetarder®</td><td>- Sika® Stabilizer-4R</td></tr></table> <p>Pre-trials are recommended if combinations with the above products are being made. Please consult our Technical Services for other Sika Products.</p>	- SikaPump®	- SikaFume®	- Intraplast® Z	- SikaRapid® series	- Sika® Antifreeze	- Sika® Aer	- Sika® FerroGard®-901	- SikaRetarder®	- Sika® Stabilizer-4R
- SikaPump®	- SikaFume®	- Intraplast® Z
